

KARAN VAJA

+91 9724427396 | vajakaran95@gmail.com | [Linked IN](#) | Veraval , Gujarat

SUMMARY

BCA graduate with additional hands-on training in Cybersecurity, Ethical Hacking, VAPT, SOC Operations, and Computer Networking. Experienced in practical labs, TryHackMe rooms, and CTF-style environments, with skills in reconnaissance, enumeration, network analysis, Linux, and web security. Familiar with Nmap, Burp Suite, Wireshark, Gobuster, Nikto, Nuclei, WPScan, and Metasploit, with working knowledge of Python, HTML, CSS, and React.js.

EDUCATION

Bachelor of Computer Applications (BCA)
Bhakta Kavi Narsinh Mehta University (BKNMU), Junagadh
CGPA: 7.02

july 2023 - march 2026

CERTIFICATIONS & TRAINING

- **Hackviser** Certified Cybersecurity Foundations (CORE)
- **Tata-Forge** Cybersecurity Analyst Job Simulation
- **TryHackMe** Hands-on Cybersecurity Labs and CTF Practice

TECHNICAL SKILLS

- **Cybersecurity:** VAPT, Vulnerability Assessment, Ethical Hacking, SOC Operations
- **Networking:** TCP/IP, OSI Model, IPv4, Subnetting, DHCP, DNS, Network Troubleshooting
- **Security Tools:** Nmap, Wireshark, Burp Suite, Gobuster, Nikto, Nuclei, WPScan, Metasploit
- **Programming:** Python (Working Knowledge), HTML (Working Knowledge), CSS (Basic), React.js (Basic)
- **Other:** Git/GitHub, Security Reporting,

PRACTICAL SECURITY EXPERIENCE

- **TryHackMe:** Completed 65+ hands-on rooms covering Linux, networking, reconnaissance, enumeration, and security challenges.
- **Achievement:** Top 6% ranking, 15 badges, and a 31-day learning streak at the time of resume preparation.
- **CTF Practice:** Applied enumeration, wordlists, steganography, password analysis, and Linux command-line techniques in controlled labs.
- Practiced identifying attack surfaces, analyzing findings, and documenting security observations.

PROJECTS

HIDDEN EYE

Developed a Python-based tool for detecting and analysing hidden data in image files. Designed a dark-themed GUI with keyboard shortcuts to improve usability during security analysis. Implemented a controlled lab module using custom and predefined wordlists for steghide-related CTF and security-audit exercises.

- Python-based steganography detection and analysis
- Dark-themed GUI with keyboard shortcuts for security analysis
- Custom and predefined wordlist support for steghide CTF exercises

V.K. PASSWORD GENERATOR PRO+

Developed a Python-based password generation and security utility with multiple password-generation approaches. Implemented secure credential storage using the Python cryptography library and Fernet encryption. Built a password-strength analyzer that checks entropy, common patterns, sequential characters, and character diversity. Added practical security recommendations to help users create stronger passwords.

- Multiple password generation algorithms for varied security needs
- Fernet encryption for secure credential storage and management
- Password strength analyzer with entropy and pattern detection
- User-friendly security recommendations for stronger passwords

FACE DETECTION SYSTEM (BCA COLLEGE PROJECT - PYTHON)

Developed a real-time face detection system using OpenCV and Python. Implemented Haar Cascade classifiers for detecting faces in images and video streams. Built as a college project to demonstrate computer vision fundamentals and practical OpenCV integration. Utilized AI/ML concepts and OpenCV's pre-trained cascade classifier for accurate facial recognition.

- Real-time face detection using webcam with OpenCV library
- Haar Cascade classifier for accurate facial recognition
- Live video feed with highlighted face regions using bounding boxes
- AI-powered detection using pre-trained machine learning models

CYBERSECURITY PORTFOLIO WEBSITE (2026)

Developed a modern, responsive cybersecurity portfolio website showcasing expertise in penetration testing, VAPT, and SOC operations. Built with Flask and React.js, featuring a dark cyber/neo aesthetic with interactive components.

- Fully responsive design with dark cyber/neo aesthetic
- Real-time contact form with Flask-Mail email integration
- Dynamic project filtering system with categories
- Interactive skill cards with animated progress bars
- WhatsApp booking and resume download features

CAREER TARGET

Seeking an entry-level opportunity as a Junior VAPT Analyst, SOC Analyst L1, Cybersecurity Analyst, IT Security Trainee, or Network Security Support professional where I can apply hands-on lab experience and continue developing practical security skills
